[www.tkcpdwarana.org](http://www.tkcpdwarana.org) Ph. No. 02328-223501

## **Purpose:**

- To study and understand the organization and administration of hospital which will help us to study subject Pharmaceutics & Hospital and Clinical pharmacy.
- To study practical implementation of medical care services, pharmacy service to patients

## **Introduction:**

We the students (Number of students: 60) of Tatyasaheb Kore College of Pharmacy, Warananagar visited Primary Health Centre Sub-District Hospital, Kadoli. The hospital is multispecialty hospital. These are complex organization utilizing specialized scientific equipment's & functioning through a team of trained staff educating to the problem of modern medical science.

The hospital staff nurse told us all the information about hospital & its different departments. Prior to the visit he told us about the establishment of hospital & purpose to build the hospital

## **About the Visit:**

Following departments were seen in the OPD

- Reception
- Consulting dept
- Orthopaedics Dept
- X-Ray Dept
- Pathology Laboratory
- Ophthalmic Dept
- Pharmacy

The consulting department is for orthopaedics and surgery. Each of the department is headed by MD doctors. Patients after admission in hospital treated by Doctors & in case for diagnostic purpose sent to diagnostic laboratory of hospital. Next we saw the minor & major OT, sterility maintained in the section CSSD Dept which deals with sterilization of different surgical instrument. ICU was also seen by the students & facilities available there. There is eight to ten bed ICU.

There we saw following departments like radio diagnosis which deals with internal photograph of the body which helps to diagnose bone disorder.

Then pathology department was also seen which deals with analysis of blood samples RBCs, WBCs & Hb. The department also deals with analysis of samples like urine, sputum & stool. A histopathology departments which deals with detection of change in tissues caused by diseases.

Patients with minor health problems are treated & send to home with required medicines. Those patients having major health problems should be admitted in hospital. Also we saw general wards, special ward, nursing station for patient care, medical & sanitary departments which takes care of biomedical waste generated hospital. At last we went to hospital pharmacy departments. Pharmacist has more opportunity to interact closely with the prescriber & therefore to promote rational prescribing & drug use also pharmacist can effectively perform duties like patient monitoring, patient counselling & record maintenance

While discussing the administration of hospital, they told us the staff pattern

- Governing body
- Medical director
- Administrator
- Medical staff – residential medical staff, associate medical staff, consulting medical staff & honorary medical staff .
- Nursing service administrator
- Nursing superintendent
- Housekeeper
