### | About Workshop |

Auditing is a most critical function within a pharmaceutical industry. Audit and regulatory compliance ensures that procedures are consistent with contractual and regulatory requirements. Failure to do so may lead to prosecution, recall, seizure, fine, jail time etc. So, for the management it is a serious exercise. The industries that develop a risk-based approach to audits are able to remain competitive while meeting quality and regulatory compliance on regular basis.

To endow teachers with fundamental industry knowledge about cGMP audits and regulatory compliances through the knowledge sharing from people experienced in industry this workshop is arranged.
